ABOUT US

Mushor Technology is a value added distributor located in Saudi Arabia, representing premier international brands.

Mushor Tech. is a leading value-added distributor specializing in electrical test and measurement instruments, power tools & safety, networking infrastructure solutions, Low current solutions, Network Field testing equipment, Tools and telecommunication test and measurement instruments, focusing on delivering innovative solutions and exceptional service.

Our vision is to become the country's premier service-oriented provider and employer of choice in all our business activities. By achieving extraordinary results with innovative technologies, we aim to benefit all stakeholders.

Our mission is to consistently deliver secure, premium-quality solutions and services that meet the highest safety, reliability, and excellence standards.

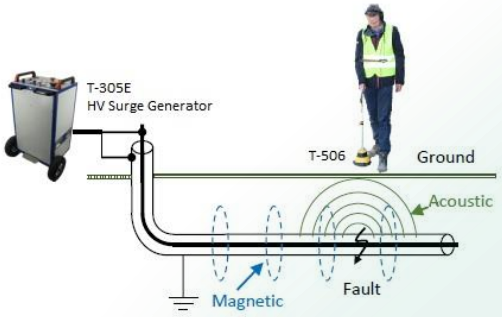
Fluke Corporation is the world leader in the manufacture, distribution and servicing of electronic test instruments and software.

Fluke tools help business and industry work across the globe, from industrial electronics installation, maintenance and service to precision measurement and quality control.

KEHUI Cable fault Location: locate and pin point the damage in the cable for easy repair by identifying the right cables been damages .

Product Range

- **T-P22** and **T-P23** Low Voltage Fault Locator
- **T-308** Compact Portable Surge Generator
- High Voltage Surge Generators
- Power Cable Fault Pre-locators
- **T-506** Pinpointer
- **T-900** Hand-held TDR
- **T-710** Intelligent Cable Identifier
- **T-L300** Cable And Pipe Locator
- Battery Ground / DC Earth Fault Location Set
- Test Van



b2 electronics is a provider of advanced diagnostic and testing equipment for the electrical industry.

Innovation in High Voltage

VLF Cable Testing and Diagnostics & Transformer Oil Testing.

VLF Cable Testing and Diagnostics

Partial discharge & Tan diagnostics sets

Merytronic provides fundamental sets specified in LV and MV network topology management, digitalization, monitoring solution, cable identification, maintenance of underground cables.

Product Range:

1. **ILF G2 Pro: Feeder & Phase identifier:** Live LV network phase and feeder identifiers
2. **MRT700 Underground Cable Locator :** De-Energized and Energized cable Tracer.
3. **Ariadna CI:** Identification of De-Energized and Energized cable, LV and MV networks.

ILF G2 Pro

Ariadna CI

MRT700

Vanguard offers a wide range of microprocessor-driven circuit-breaker analyzers that can fully analyze a circuit breaker's performance

Vanguard Instruments
A DOBLE COMPANY

Applications: Utilities, Manufacturing, Transportation; used on switchgear, transformers, cables, and rotating machines.

Power Supply

The KoCoS Technology Group is a group of companies with a global presence which develops, manufactures and sells measuring and test systems for equipment in electricity supply systems and laser-optical inspection systems for quality monitoring.

- Circuit Breaker Testing
- Resistance measurement
- Protection relay testing
- Meter testing
- Digital fault recording
- Power quality analysers
- Power sources

EA technology is an industrial leading technology uses to detect partial discharge issues and pin point problems in electrical networks

Partial Discharge Solutions handheld and fixed Monitoring

The company offering both solutions ,Fixed monitoring of electrical networks for cables and switchgear and handheld partial discharge screening.

Safer, Stronger, Smarter Networks

GOLIGHT

Revolutionary Lighting Solutions

Golight GT, Stryker ST, and GXL series are designed for military, public-safety, work trucks, and marine applications.

GOLIGHT GT

The Golight GT builds on the original Golight/Radioray line. It features enhanced durability, more precise pan/tilt control, and an updated exterior design.

STRYKER ST

The updated Stryker ST Series incorporates all the functionality of the original, but with added features. Both wireless and hardwired systems give the operator full control over two lights, either independently or in tandem and include a "command home feature".

GOBEE

Whether you are navigating open-water or a narrow channel let our Gobee be your guide. This stanchion-mount spotlight will increase the safety of your travels.

GXL

The GXL LED Xtreme Lighting *Performance Series* offers extremely durable and incredibly intense fixed mount lighting. It is backed by a 10-Year Warranty.

Remote Control Lights

Fixed Lights

sofamel
Made in SPAIN

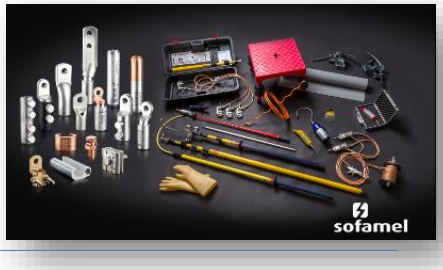
Sofamel offer a wide range of personal protections accessories and equipment's allowing engineers and technicians to work with energized electrical network safely.

Product Range:

- Voltage detectors, Earthing and short circuit equipment
- **Personal Protection Equipment** (Gloves , Harnesses lifeline set)
- **Insulation** (Stool , Mats , Di electric Boots , Insulation poles)
- **LV measurements instruments**: multimeters, clamp meters, earthing testers, etc..
- **Hand Tools, Tool Kits**
- **Connectors** (Cable Lugs , Ferrules , Bi metallic Lugs , Split bolt connectors)

Safety Tools Solutions.

Safety first when it comes in working with life electrical networks and using high efficient tools, connectors and personal safety.



KLAUKE

Klauke is renowned for its high-quality electrical connection systems and tools for crimping, cutting , punching, battery-powered hydraulic cutting and crimping tools with integrated voltage protection up to 1,000 V.

EMSYST

General The EE Meter Test System is used for testing of all types of electricity meters on-site or in a laboratory.

In a laboratory, the test System is used with a Quick Meter Connector.

Product Range:

The System consists of two units: -

Unit 1: EE-120A-3S-Color – Three-Phase Current Generator to 120A and Energy Standard class 0.04; -

Unit 2: EE-500V-3 – Three-Phase Voltage Generator up to 500V controlled from Unit 1 via RS485.

The Phantom Load is able to generate three-phase voltages and currents with unprecedented stability and accuracy.

The following meter tests can be carried out with the EE Test System: Error Test, Register Test, No Load Test and Starting Current Test. Full analysis of the customer load is easily performed with current clamps to 120A.

Current transformer parameters and Z-Burden on the secondary can also be measured. The test results (maximum 100 Files) are saved in an internal Flash or on a SD Memory Card.

ÜNTEL

UNTEL KABLO

Product range consists over 15.000 different types of cables, covers both rubber and thermoplastic cables up to Medium Voltage (MV) range. ÜNTEL's power and instrumentation cables supplies energy for industries which requires experience like marine, offshore, mines and tunnels, airports, railways and have been used in industrial ways such as heavy-duty rubber drum reeling cables, welding cables, control cables and fire-resistant cables.

Product Range:

- Industrial & Instrumentation Cables
- Shipbuilding & Naval Cables
- Offshore Cables
- Mining And Tunneling Cables
- Crane Cables
  - Airport Cables
  - Railway Cables
  - Defense Industry Cables
  - Custom Design Cables

INSULA
Insulated Tools for Electrical Safety

INSULATED HAND TOOLS FOR ELECTRICAL SAFETY

GET SAFE
INDUSTRIAL SAFETY EQUIPMENT

TEST VAN

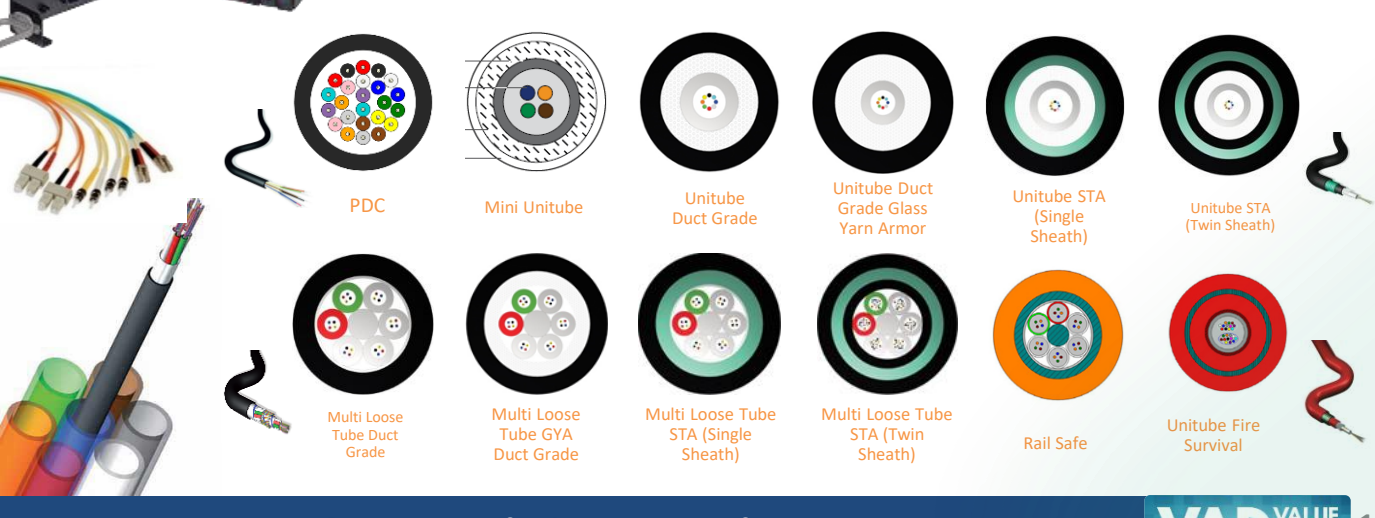
The Test Van is a specialized mobile unit designed to offer a comprehensive and efficient solution for cable testing, diagnostics, and fault localization. It is equipped with advanced tools and technology to help operators perform a wide range of tasks related to cable networks.

Typical Components of a Cable Test Van:

- ❑ **Power Generator** – To supply electricity for all the test equipment.
- ❑ **Cable Testing Instruments** – Includes:
  - **VLF (Very Low Frequency) (**HVA68-2**)** and PDTD (PDTD60-2) test systems
  - **Insulation Resistance Testers (**Fluke 1555 10KV).
  - **Cable Fault Location Equipment** T-1200
  - **Cable tracer & identifier (**MRT-700 & Ariadna CI).
- ❑ **Cable/ Hose Reels** – For easy deployment and connection to the cables being tested.
- ❑ **Safety Equipment** – Such as grounding kits, gloves, and protective gear.
- ❑ **Climate Control (AC or ventilation)** – To keep instruments within safe operating temperatures.
- ❑ **Internal Workbench or PC Interface** – For data recording, analysis, and control.

LEVITON®

Leviton is a leading provider of high-performance network infrastructure products and systems designed to support various applications. comprehensive portfolio of products including copper and fiber optic cabling systems, connectivity solutions, and smart building technologies.



VIAVI Solutions

VIAVI Solutions is a global provider of test, measurement, and assurance solutions for various network types—including telecom, enterprise, cable, wireless, and cloud.

ARGUS®
testing the telecom network

Argus is a German company specializing in manufacturing testing, qualification, and troubleshooting solutions for XDSL, TPS services, G-PON, XG-PON, XSG-PON, and ethernet services.

ARGUS® F300

Universal fiber tester

ARGUS® F300 is a pure fiber tester that combines OTDR and selective OPM and is also able to determine and display the PON ID and XGS-PON ID. It is the only device in the world that combines these fiber test functions in one device.

ARGUS 260

The broadband tester

ARGUS® 260 all-in-one tester delivers improved performance for testing broadband interfaces.

ekahau WIRELESS DESIGN

***Ekahau** is a company that specializes in Wi-Fi optimization, design, and troubleshooting tools for business-critical WLANs (Wireless Local Area Networks).*

If You Want Great Wi-Fi, You Need Sidekick 2

The fastest, most precise Wi-Fi testing and measurement device now supercharged and tuned for 6 GHz, 5 GHz, and 2.4 GHz

Key Features:

- 2.4/5/6 GHz Wi-Fi Site Survey & Spectrum Analysis
- 4 Tri-Band Wi-Fi Radios
- 9 CustEnterprise-Gradeom Wideband 3D Antennas
- 50 Sweeps/Second Spectrum Analyzer
- All-Day Battery Life
- Whisper-Quiet Active Cooling
- USB-C Connectivity
- Support all regulatory domains
- For use with Android, Windows, iOS or macOS

Ekahau Sidekick 2

WAVECONTROL
Safety, Quality, Service

Wavecontrol specializes in developing test equipment for assessing human exposure to electromagnetic fields (EMF) .

Personal Monitors for human exposure to EMF

3 INSTRUMENTS IN 1

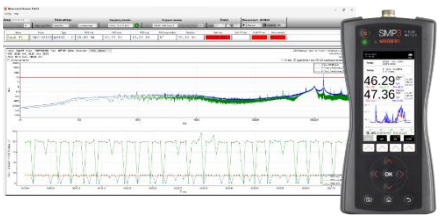
DC Field measurements

Spectrum Analysis – FFT up to 10 MHz

Broadband measurements up to 60 GHz

Safety in Electromagnetic Fields:
RF safety / EMF safety

Field Strength Meter



EMF Measuring System for Automotive Standards

MonitEM RF Area Monitor

NEW

MonitEM-IoT

Next Generation of Electromagnetic Field Area Monitor

PROMAX

Promax electronics is a manufacturer of telecommunication instrumentation and professional electronics equipment with over 50 years of experience in this sector.

Educational Trainers, Educational T&M Solutions

- Oscilloscopes, Function Generators, Power Supplies …etc.

Optical Fiber T&M Solutions

- PM, LS, VFL, Fiber inspection, OTDR .
- Optical Fiber Accessories.
- Core Alignment Fusion Splicing Machine.

Telecom & Broadcasting T&M Solutions

- TV Cable / Satellite Signal And Spectrum Analyzer.
- Spectrum Analyzer For Terrestrial Signals, Satellite Signals, Broadcasting Signals.
- RF Spectrum Analyzers .
- RF Signal Generators.
- Field Strength Meters

Signal analyzer

MONITORING SYSTEMS

They are designed specifically for broadcasters who need to ensure the operability of their networks and determine the source of illegal TV and radio signals.

KLEIN TOOLS

Klein Tools is an American manufacturer of hand tools, particularly for professionals in the electrical and telecommunications.

Apprentice Tool Set

Twisted Pair Installation Kit

Data & Coaxial Kit

Tempo Communications is a U.S.-based company specializing in providing a wide range of testing and installation tools for the telecommunications, data communications, and electrical industries. Formerly part of Greenlee, Tempo became an independent entity focused on delivering innovative solutions for professionals in these fields.

FTK-PP Pro Plus Fiber Tool Kit

TM900 Telephone Test Set

701K-G

Tone and Probe Kits

FI-100 Fiber Identifier

Installation Tools

A comprehensive set of hand tools for cabling and networking professionals.

Synology

Synology Provides Storage Solutions Through Network Attached Storage (NAS) Devices And DiskStation Manager (DSM) Operating System.

Synology NAS devices require users to install compatible Hard Drives or SSDs separately.

- Synology Offers All NAS Solutions.
- Their devices run on DiskStation Manager (DSM).
- They provide scalable storage options with all type of RAID Support, in addition to SHR and SHR-2
- DSM includes tools for data management and backups.
- Synology NAS doubles as a media server.
- Security features include encryption and ransomware protection.
- Collaboration tools like file sharing and document editing are available.
- Virtualization support enables running virtual machines.
- Surveillance capabilities are provided through Synology Surveillance Station.
- Synology NAS units integrate with cloud services for backup and synchronization.

Ruijie NETWORKS

Ruijie has researched and self-developed 8 product-lines, including switches, routers, wireless, cloud class, security, gateways, IT management and authentication & accounting.

Products range:

- Ruijie Enterprise Network Solution
- Hospitality Wi-Fi Solution
- Reliable+ and Smart+ Network for CCTV
- Smart Office Solution
- WiFi 6 Solution
- Industrial Switch
- Cloud Management Solution
- 25G/100G Data Center Solution

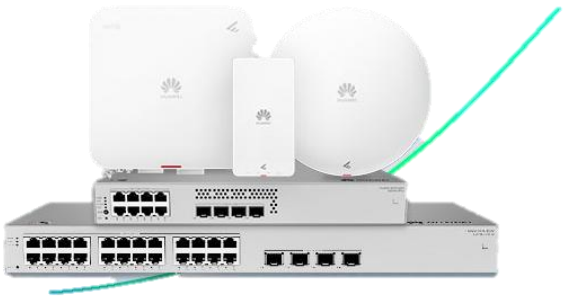
VERTIV.

An uninterruptible power supply, also uninterruptible power source, UPS or battery/flywheel backup, is an electrical apparatus that pro- vides emergency power to a load when the input power source, typically mains power, fails.

UPS SYSTEM

- UPS (Uninterrupted Power Supplies)
- UPS batteries
- UPS accessories.

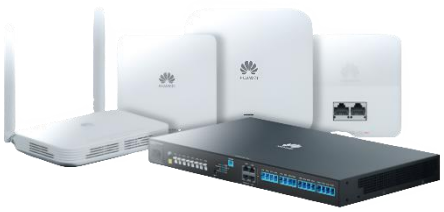
HUAWEI



SME Network

APs, Switches, Routers, ACs — complete wireless & wired networking for SMEs

MiniFTTO & Range Extender solutions for high-speed last-mile connectivity



Smart collaboration boards (65"/75"/86") for hybrid meetings and classroom

HUAWEI eKit

Invixium is a global leader in **biometric solutions** engineered for access control, workforce management, and visitor screening.

Key Solutions and Products

•**Access Control:** Invixium provides modern security systems that authenticate individuals using unique biometric characteristics, eliminating the need for keys or traditional cards which can be lost, forgotten, or stolen.

•**Workforce Management:** Their solutions assist with accurate time and attendance tracking, which helps businesses streamline payroll and manage employee shifts efficiently.

•**Health and Safety:** The company also offers touchless solutions with features like elevated body temperature detection to support health screening at entry points.

•**Products:** The product lineup includes various devices like the flagship IXM TITAN (multi-factor face recognition), TFACE, ROSTO, and TOUCH 2 (fingerprint).

•**Software:** The IXM WEB software platform serves as the central management system for enrolling users, managing devices, and generating analytics and reports.

Nedap is a leader in Digital Twin solutions, bridging the physical and digital worlds in Healthcare, Retail, Security, and Livestock. Our technology stack—built on IoT, RFID, Vision, and SaaS—provides real-time insights to optimize operations, manage risks, and drive data-driven decisions. In short, Nedap's Digital Twin Technology empowers businesses to unlock their full potential.

Nedap develops technologies that connect the **physical world with digital systems** using tools such as **RFID, IoT devices, sensors, and cloud software** to provide real-time data and automation.

Main Business Areas

1.Security & Access Control

Systems for identification and access management for buildings and secure facilities.

2.Retail Solutions (RFID)

RFID-based inventory management and anti-theft systems used by retail stores to track stock and reduce losses.

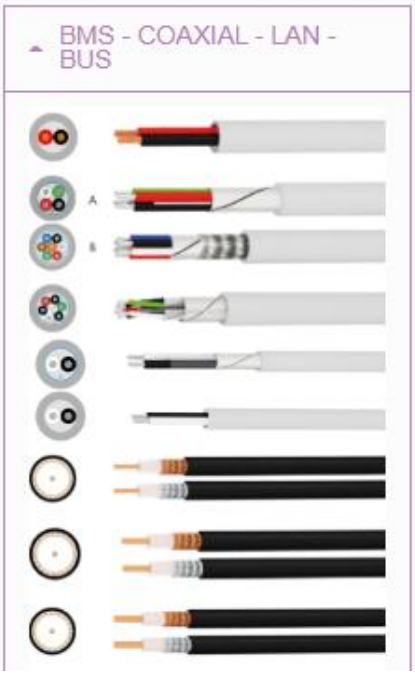
3.Healthcare Software

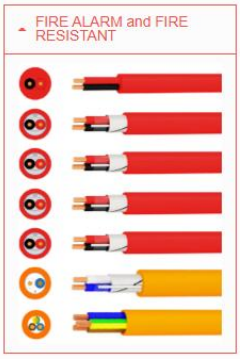
Digital platforms for healthcare providers to manage patient care, scheduling, and administration.

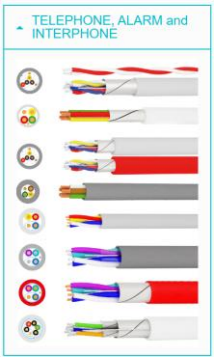
4.Livestock Management

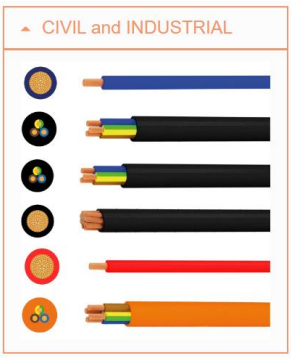
Smart monitoring systems that track the health, fertility, and activity of farm animals using sensors.

Ramcro is an Italian manufacturer specializing in high-quality, customized cable solutions for industries like Oil & Gas, fire safety, BMS, and data/signal transmission









centiel
continuous power availability

Swiss made and designed Uninterruptible Power Supplies for the present and future of the most critical power applications.

Centiel UPS is a Swiss manufacturer of advanced modular **Uninterruptible Power Supply (UPS)** systems designed for mission-critical power protection.

Centiel UPS systems are widely used in data centers, healthcare, telecom, and other critical infrastructure requiring uninterrupted power.

Swiss UPS manufacturer

A single, trusted value-added distributor across many technology disciplines

Multi-Discipline Portfolio

Electrical test & measurement, Networking and Telecom T&M, Networking passive infrastructure solution & low current solution, access control solution, VMS, and UPS & batteries — one distributor, complete coverage.

30+ World-Class Brands

Fluke Networks, **L**eviton, **C**entiel, **N**etally, **T**empo, INNO, **V**IAVI, **A**rgus, **K**lein Tools, Synology, **R**uijie, **R**amcro, Invixium, **N**edap, WaveControl, and more — backed by certified technical support.

Fluke, b2 electronics, Untel, Kehui, Kocos, Sofamel, Merytronics, Vangurad (A double company), EMSYST, Go-Light Kaluke, INSULA and more — backed by certified technical support.

Saudi-Wide Presence

Headquarters in Riyadh (Al Washm Tower), plus showroom in Riyadh Al Olaya ,Khobar, and Jeddah — close to your projects, wherever they are.

Value-Added Expertise

Pre-sales engineering, product selection, configuration support and after-sales service — not just box-moving distribution.
